Kornit Digital, the top digital textile printing solutions provider in Israel will be faster and more cost-effective than ever with LVS

Founded in 2002, Kornit Digital is a global company, headquartered in Israel with offices in the USA, Europe, and Asia Pacific. It supplies digital textile printing machines to more than 1,100 customers in more than 100 countries worldwide.

Kornit Digital develops, manufactures and markets industrial digital printing technologies for the garment, apparel, and textile industries. Kornit Digital is focused on enabling the mass customization of printed textile products.

Leading the digital textile printing industry through its revolutionary NeoPigment process, including an integrated pretreatment solution, Kornit Digital caters directly to the needs of both designers and manufacturers, addressing the changing needs of the entire textile printing value chain.

Kornit Digital meets consumer expectations from the fashion industry as it is transforming to a new digital-based benchmark: 24-hours delivery of personalized orders. Having this as a guide, Kornit Digital decided to invest in a modern and adaptable WMS that would help them cover their growing needs and achieve the aforementioned 24-hours delivery.

Kornit Digital opted for Logistics Vision Suite by Mantis because of its ability to optimize all logistics processes and because it will assist them in the effort for great quality and the highest level of customer service.

Kornit Digital is building a new logistic center in Kiryat Gat to accommodate its fast-growing logistics needs. This new Distribution Center will incorporate VLM and Put Wall (Sort to Light).
